New OACYS.COM Website

Reliable High Speed Internet Service!
Speeds starting at 1.5 Mbps and custom plans available up to 100 Mbps. With OACYS there are no contracts or early termination fees.
View Residential & Business Plans

We're excited to unveil our all-new website at OACYS.COM!

The project has been in progress since summer, led by OACYS website development specialist Shelly Cervantes.

It doesn't replace the original ocsnet.net or porterville.com, but is rather a companion site that's focused primarily on the variety of services we offer – from Internet, VoIP, and web design to IT consulting and computer repair

The new site (www.oacys.com) is optimized for laptops, tablets and mobile devices … please visit and let us know what you think!

Coming Soon

In addition to our recent office remodel and the new OACYS.COM website, we're excited to announce that there's even more in the works!

COMING SOON!

New Signage. With an expanse of newly replaced facia, it's now time for new signs. We're working with one of the oldest sign companies in the valley to not only go "high tech" on each of the four elevations of our building, but also to replace the faded panels in our large pole-mounted sign. We expect this project to be completed soon after the first of the year.

Speed and Bandwidth Improvements. We've written many times about the rationale behind our long-time bandwidth usage policies. Companies who claim "no limits" or "no throttling" are either hiding something in their fine print, or are essentially leaving their customers to engage in a free-for-all with their neighbors, competing for the same limited supply of

bandwidth. Bandwidth is ultimately limited by technology, not policy, and there is simply no such thing as "unlimited."

At OACYS we've always preferred realistic and responsible bandwidth management, and as a result our customers can expect to get the performance, reliability and quality of service they're paying for.

We've also promised that as technology advances, we will keep our network updated and pass performance improvements along to our customers – which we've demonstrated through a number of recent speed and bandwidth usage increases (see plan details below).

We're currently testing new equipment and software management controls to provide an alternative to excess bandwidth usage fees, and perhaps improved options for customers who prefer online video services like Netflix. We hope to announce these further changes in the near future – stay tuned!

Fan Mail

"After considering Clear[wire] and two local WISPs as alternatives to satellite, I spoke with several pleased customers of OACYS and that tipped the scale. Installation was quick and done by a fellow who knew his job well. Their service has consistently performed well, almost without exception at the full promised speed, and uptime has been excellent. There has been little reason to deal with tech support, but the company has been very responsive to enquiries. After some 4 years I'm still pleased and a happy camper." Posted on DSLReports.com

Shellshock

The Shellshock vulnerability was first disclosed in late September. Primary targets are ubiquitous Unix and Linux based web servers, and millions of probes and attacks have since been recorded by security companies, including many against major national and global networks.

Shellshock could potentially be used to compromise very large numbers of unpatched servers and other systems. Thus, it has been compared to the Heartbleed bug in its severity.

Veteran OACYS network operations manager Ryan Walker took immediate security measures following this disclosure, and we can report that our system has not been affected.

Correction

Our October newsletter was printed just before the Microsoft press event on September 30th in San Francisco, at which the next version of Windows was announced.

Prior to that event, the tech news industry had been referring to this next version as "Windows 9," which we repeated in our newsletter article.

However, Microsoft subsequently announced that the new version, due to be released in 2015, will be called "Windows 10."

Tired of satellite or Clearwire? You're not alone … many of our new OCS accounts are customers switching from satellite, DSL, Clear[wire] and others. Tell your friends and receive a referral credit for up to a month's free service.

OACYS WIRELESS INTERNET SERVICE PLANS

Wireless Plan Types	Average Speeds (Mbps)		Monthly Usage	Mailboxes	One-Time Fees		Monthly Service
	Max	Typical			Installation	Equipment Deposit	
	(Note 1)		(Note 2)				
RESIDENTIAL					*All Plans*		
Basic	1.5M	1M	20GB	5	100.00	Waived	49.95
Premium	3M	2M	40GB	10			79.95
BUSINESS							
Business	3.5M	2.5M	60GB	20			129.95
Professional	4.5M	3.5M	70GB	25			159.95
Corporate	6M	4.5M	90GB	30			199.95
Enterprise	8M	6.5M	120GB	40			249.95
MOUNTAINS							
Yokohl, Balch, Bear Creek	(Note 3)						
Alpine, Pierpoint, Nelson	1.5M	768K	20GB	5			69.95

(1) Residential and Mountain Area plans are asymmetrical, with uploads at 50% of download speeds. All Business plans are symmetrical.
(2) Usage is the allowed bandwidth per month. Surcharges apply for excess usage.
(3) Add $10 monthly rural service fee to any Residential or Business plan.

I Didn't Know That!

- OCS provides "A-to-Z" technology services
- Complete computer service and repair shop
- Variety of Internet access plans and packages
- Professional website development and hosting
- Programming and custom development
- eCommerce solutions
- Computer and Internet technology consulting
- Secure branch office inter-networking
- Internet-based "VOIP" telephone services
